Indicator							This quarter	Last quarter	Target		
Prevalence — patients with any pressure injury ÷ inspected × 100									Track		
Hospital-acquired prevalence (HA ÷ inspected × 100)									≤ 3 %, falling		

No.	Ward	Risk score on chart	Assessed within 8 h of admission	Injury present	Stage	Site	Present on admission / acquired	Repositioning record	Support surface	Heels off-loaded	Nutrition screen
Risk assessed within 8 h of admission										≥ 95 %	
At-risk patients with full bundle in place										≥ 90 %	
Stage 3–4 / unstageable hospital-acquired this quarter (number)										0	

ASF standards: Standard 4 — pressure-injury prevention (quarterly prevalence audit); Governance — reporting
