WASH FIT — Water, Sanitation and Hygiene Facility Assessment

The WHO/UNICEF improvement tool condensed to one sheet: water, sanitation, hand hygiene, waste, cleaning, energy — thirty indicators, three levels, and the improvement plan that follows

Facility · date · WASH FIT team members

Indicator	Met	Partly	Not met	Action / owner
1 · Water				
Improved water source on premises, available every day	☐	☐	☐	
Water available at all points of care and in toilets	☐	☐	☐	
Storage for at least 2 days of use, covered and cleaned	☐	☐	☐	
Drinking water safe (treated or tested) and available to patients and staff	☐	☐	☐	
Water quality tested at least monthly (free chlorine ≥ 0.2 mg/L or E. coli absent)	☐	☐	☐	
2 · Sanitation				
At least one functioning, clean, private toilet per 20 users, separate for patients/staff and by sex	☐	☐	☐	
A toilet accessible to people with reduced mobility	☐	☐	☐	
Menstrual hygiene facilities (bin, water) in female toilets	☐	☐	☐	
Toilets cleaned and recorded at least twice daily	☐	☐	☐	
Wastewater and faecal sludge safely managed	☐	☐	☐	
3 · Hand hygiene				
Functional hand-hygiene stations at every point of care (rub or soap and water)	☐	☐	☐	
Hand-washing stations within 5 m of every toilet, with soap	☐	☐	☐	
Hand-hygiene compliance audited (Toolkit 2)	☐	☐	☐	

Indicator	Met	Partly	Not met	Action / owner
Hand-hygiene posters displayed	☐	☐	☐	
Hand rub or soap never runs out (stock check weekly)	☐	☐	☐	
4 · Health-care waste				
Waste segregated at source into at least three streams (Toolkit 10)	☐	☐	☐	
Sharps in puncture-proof boxes at point of use	☐	☐	☐	
Secure interim storage, collected within 48 h	☐	☐	☐	
Safe final treatment or disposal (incineration, autoclave, licensed collector, protected pit)	☐	☐	☐	
Staff trained; sharps injuries logged	☐	☐	☐	
5 · Environmental cleaning				
Written cleaning schedule for every area; records kept (Toolkit 7)	☐	☐	☐	
Cleaning staff trained and equipped (gloves, boots, detergent, disinfectant)	☐	☐	☐	
Laundry processed at ≥ 70 °C or with disinfectant	☐	☐	☐	
Food preparation area clean, separate, pest-controlled	☐	☐	☐	
Facility grounds free of standing water and refuse	☐	☐	☐	
6 · Energy and environment				
Reliable electricity in delivery, operating and emergency areas (backup ≥ 72 h)	☐	☐	☐	
Adequate lighting and ventilation in wards	☐	☐	☐	
Cold chain for vaccines and blood maintained and logged	☐	☐	☐	
Building structurally sound, accessible, protected from flooding	☐	☐	☐	
Climate-resilience risks assessed (heat, flood, drought)	☐	☐	☐	
Score: Met = 2 · Partly = 1 · Not met = 0. Total _____ / 60				Domain totals: Water ___/10 · Sanitation ___/10 · Hand hygiene ___/10 · Waste ___/10 · Cleaning ___/10 · Energy ___/10
				< 30: high risk — Tool 2 plan this week

Condensed from WHO/UNICEF, Water and Sanitation for Health Facility Improvement Tool (WASH FIT), 2nd ed., 2022 — which has 65 indicators in 7 domains. Where national standards are stricter, use them.

ASF standards: Standard 3 — water, sanitation, environment; Crisis and Transitional categories (adapted means of verification); Universal Floor — hand hygiene
