Foreword

This catalogue lists every tool in the ASF Patient-Safety Tools Library as published at france-asf.fr/tools on the date above. Each tool is a single A4 sheet (occasionally two or three), rebuilt from openly licensed WHO, IAEA, AHRQ, CDC or NHS material or written by ASF, in the ASF house style, with the source and licence stated in its footer and the ASF standard and criterion it evidences stated at its foot. Every tool has its own web page and QR code; every toolkit can be downloaded as one zip.

Numbering: toolkits 1–32 are grouped in six tiers. Within a toolkit, tools are numbered in order (1.1, 1.2 ...) and carry the reference ASF-TOOL-[toolkit code]-[number]. A tool referenced in another tool is cited as "Toolkit N, Tool M".

Status of the tools. English master editions. Drug doses, clinical thresholds, colour schemes and legal references must be confirmed by the facility's clinical and legal leads against national protocols before use. Georgian editions follow clinical review. The library is free to reuse under the licence stated on each sheet; the ASF block stays on every copy.
